THE INTELLIGENCER.

WHEELING, OCTOBER 80, 1899.

Senator Pettigrow's "Patriotism." Senator Pettigrew, of South Dakota was reported to have said in a speech at Woonsocket, that he was ashamed of his country's flag and that it ought to be hauled down. He now comes forward with an explanation which deems as a qualification of the words imputed to him. It is very lame and halting. The speech referred to was an attack on President McKinley, and his contention was that the President was wrong in assuming that Providence had anything to do with the United States in occupying the Philippines. "I said." he explains, "that if God had anything to do with the transaction He must have come to McKinley in a vision, thus making the President the latest of the prophets, and that in this way only could God be made responsible, under the circumstances, for our claims of sovereignty.
"I said that I refused to receive such

messages from God transmitted through such a source and refused to recognize a God who would use such an implement as a means of making his wishes known to us; that our flag stood for a principle, for an idea, for the doctrines of the Declaration of Independence; that it was emblematic of these, and when raised in violation of the ideas for which it stood and the principle which made it dear to us, it was no longer our flag, and could only be restored to us by pulling it down, and that I blushed for shame for my country's honor and wished I could blot out the recent his-tory we had made. I never said I dis-

owned my country or my flag."

Mr. Pettigrew, like a great many others, gets away from the vital point. The flag that he professes to be ashamed of was insulted by the overt act on the part of Aguinaldo in rebel-ling against the authority of the United States. The rights of this country in the archipelago, strangely enough, are not disputed except at home. The fine sentimental frenzy which Mr. Petti-grew has worked up deals with an arfected reverence for the Declaration of Independence. He, with Atkinson and his coparceners, assumes the only "blown in the bottle" patriotism that is now extant, and his inelasticity of mind narrows the question down to the situation of the eleven stubborn jurymen.

Gold Production

The bureau of statistics of the treasury department furnishes some interesting information about the gold pro-duction of the world; especially is it with the cern expressed in commercial circles as to the effect of the war now going on in South Africa. The facts compiled by treasury experts show that of the \$10, 000,000,000 worth of gold produced in the world since the discovery of America, more than one-half has been produced since 1860, and more than one-fourth since 1885. Or, to put it in other words, one-half of the gold product of the last 400 years has been produc within forty years, and one-fourth within fifteen years.

The compilations summarized make the grand total of gold production from 1893 to and including the esti-mate for 1899, \$9,833,059,600. A casual examination of the figures of annual production shows so plainly the very rapid increase during the last half of the closing century of the term under consideration as to suggest a detailed examination of the relative proportion of recent production to that of the \$9,833,059,600 gold produced since 1493, \$5,341,855,600, or considerably more than one-half, has been produced since 1860, and \$2,540,260,400, or more than one-fourth, since 1885.

Regarding the effect of the suspension of gold production in the Transvaal mines, tables are given which show that the gold production of the entire world, outside the Transvaal mines, is now double that of the entire world including the Transvaal a decade ago, and exceeds that of the entire world in any year prior to 1897, thus evidencing the ability of the mines of other parts of the world to furnish more than the average additions to the world's money supply that have been made in the imme-

in spite of the frantic efforts of the Republican party to befuddle that paranount issue. The Chicago platform is as fine a specimen of Democratic art to-day as ever before, and there is nothing in it, as originally drafted that should be repudiated after four years of experience. Therefore, let the lovers of free silver be not disappointed or fear that the issue is being neglected. Naturally, new issues arise, following great foreign complications, but they do not necessarily obliterate old issues, though for a moment they may overshadow them."

This moves the Philadelphia Times, an independent Demogratic journal, to make the accompanying able reflections: "It will be seen that Bryanism means cheap reflections: "It will be seen that Bryanism means cheap money and repudiation as the corner-stone of Democratic faith, with anti-imperialism and and imperialism and anti-expansion as temporary expedients, and if his state shall give a majority on Tuesday week for the Bryan ticket, his renomination for the presidency next year may be accepted as inevitable.

It is this persistent agitation of cheap money that if adopted would convulse our industrial and business conditions from certre to circumference, that is making many intelligent Democrats decide that any Democratic victories won this year would be fatal to Democracy, as they would be won under the leader ship of Bryan himself."

General Joubert's letter to General White in relation to the death of General Symons, bears a strain of pathetic dignity that commands the admiration of the world. After expressing his sympathy with Lady Symons in the loss of her husband, General Joubert's humanity crops out in the following lines: "I trust the great God will speedily bring to a close this unfortunate state of affairs, brought about by unscrupulous speculators and capitalists who went to the Transvaal to obtain wealth, and, in order to further their own interests, misled others and brought about this shameful state of warfare over all South Africa, in which so many valuable lives have been and are being sacrificed, as instance General Symons and others."

Lone Jones' canvass in Ohio still goes rolling along in its deceptive way. The Cleveland Leader comes to the point very neatly in calling attention to the following undeniable facts: "Voters whose feelings have been wrought upon by Sam Jones' portrayal of the differ-ence between those who have worldly goods in abundance and those who have but little should remember that both Jones and McLean are rich men, and that Judge Nash, as compared with them, is a poor man."

To-morrow night will be Hallow e'en, The trusting and confiding girl will, as her mother did before her, walk down the cellar stairs with a lighted candl and a looking glass before her, expecting to see the face of her future hus band peering over her shoulder. If there is any anxious young man around, and he knows his business, she will not be disappointed.

Tremendous enthusiasm followed, and the orator received an unprecedented ovation as he descended from the platform.

"Well, it was like this," said the Armless Wonder. "Before you came in this afternoon, the current from the Electric Girl struck the Man with the Iron Jaw, who was seated next to her, and nearly set the platform on fire, By Jingo! but the manager saved the show! He's a smart man, I tell you."

"Yes, but what did he do?" inquired the Lady, impatiently.

"Well," said the Armless one, "he just rose to the occasion, that's whathe did. It was a stroke of genius. He seized the India Rubber Man on the stand above there, and shoved him in between the couple, and in an instant the Man with the Iron Jaw was insulated. See?"

ORIGIN OF EXPRESSION

Didn't Do a Thing to Him"-It was Bred in Boston.

Bred in Boston.

Worcester Gazette: The man who has run about a bit thinks he knows the origin of the expression, "didn't do a thing to him," which was frequenty heard a year ago, and is not entirely obsolete to-day. He says it came from Boston, which would indicate that it must have been in good use from the beginning, appearances to the contrary notwithstanding. According to this story, the phase was bred and spread from a police station in the neighborhood of Causeway street, in Boston. A patrolman brought in a prisoner one night with a badily cracked head. Two or three officers had been concerned in the arrest of the fellow, and it was explained that the wounds were the result of an attempt to break away from his captors. Some of the arrested many's friends had joined in the fun, the other officers had come up, and there had been a brisk tapping of clubs before the prisoner was safely installed in the official wagonette. The lieutenant looked at the blood streaks on the man's forehead and said: "Look here, Jim, you've used this duck up pretty well. You didn't have to soak him like that, did you?"

"Oh, that must have been one of the

used this duck up pretty well. You didn't have to soak him like that, did you?"

"Oh, that must have been one of the other boys," said Jim, scenting a lecture. "I didn't do a thing to this one."

"Oh, no, you didn't," shouted the prisoner in angry irony. "Oh, no, you didn't do a t'ing to me." He gave Jim various titles which, in spite of the undenlable advantages of realism, cannot be repeated here. "Look at dis. Loot, an' look at dis. Pipe de holes in mut. Oh, he didn't do a t'ing to me, he didn't." Then he conferred more titles upon Jim, besides repeating those which he had already employed, and he was led off to the cells still ejaculating, "Oh, no, he didn't do a t'ing to me." Just as the patrolman was leaving the guardroom to go back to duty a second officer with a second disturber, gathered in a little later near the scene of the frolic, came in. The offender's head was as badly cracked as the other's had been. The lieutenant smiled at Patrolman No. 1 and said to Patrolman No. 2, "Well, Reilly, I see you didn't do a thing to your man, either."

The Joke was told the next day, and as the jokes of those in authority are quick to become popular, the phrase was soon in use throughout that station, and no man showing the results of a fight could be brought in thereafter but some one would say, "Well, they didn't do a thing to him, did they?" So it spread over the country.
